Like other customers mentioned, I was surprised to find that many of the multiple choice review questions had wrong answers sited as the correct answers. I checked with my economics teacher and he agreed that many of the answers are incorrect. It's very difficult to study when you are not sure if the reason you are getting incorrect answers is because you don't understand the material or because the book is just wrong. I do not recommend this book to anyone.

I am a high school senior and needed this review book for my AP econ semester exam. I have used Princeton review in the past, and have had no problems with it. In fact, I enjoy the Princetons review having used it for US History. However, I feel as though Princeton does a less than adequate job with this book. The sections for micro and macro are so skimpy, and I almost learned nothing in review, and it was not because I know everything. One should probably try barrons. Sorry Princeton :(

Used this book not only to review for the AP test, but also during the year for my normal tests. It is detailed yet concise; would recommend!

Not helpful for the exam. Lacks detail and focus. I would buy Mr. Clifford's review guide instead. It has more details and videos.

Awesome review book. Covered everything that I learned in class plus a subject or two that wasn't taught. Highly recommend for anyone in the course, whether first or last in their class; it will be helpful. Definitely get it at least 2 weeks before taking the exam though, it's pretty dense.

My son is a senior and taking this class. The teacher recommended the book as a supplement to the classroom text and my son has been grateful to have the additional viewpoint on certain concepts. He's loving the class and feels well prepared for the upcoming test. I was on the fence

about spending more money when they get a textbook in class already, but he says it's totally worth it.

Very helpful.

First, in Macro part, the explanation is so poor that I needed to use extra videos to study. Second, numbering on the review questions have a serious problem. Third. No explanation for review questions. Fourth. too few practice questions.
