Customer Reviews

ICC is a leading organization dedicated to developing a single set of comprehensive, coordinated national model construction codes. To date, 48 U.S. states have adopted various international codes from ICC.

This is the most useful Accessibility reference I have found. It contains both the narrative and the diagrams necessary to design to current accessibility codes.

It is exactly what I needed it. I highly recommended for people that have to go to site to check ADA guidelines.

Basic information and not worth to buy. Much better if buying other books in the IBC and i am keep writing as the site request.
