Age Range: 4 and up

Grade Level: Preschool and up

## **Customer Reviews**

My 4 year old grandson is the only one who wasn't getting homework and he felt left out. He loves, loves, loves, doing this book. He started to build confidence in his ability to come up with answers by thinking things out and following instructions. This book became a friendly, fun, learning experience. I'm usually ready to quit before he is. He enjoys doing the work in this book.

Perfect for my 4.5 year old that loves to do "school" with his sister. We homeschool and this will be perfect for him to keep busy and feel like he has his own school work too!

I wanted that book when I saw it in a store. But a new costs quite a lot. So i decided to buy a used one. The content is good. Easy to read and teach.

My 5 year old granddaughter loves this book. I got it for her birthday and he wants to do everything

that is in it. It has a good variety and is a great value.

My 4 year old loves this. She happily sits and does this book while her older sister does her homework. It is a lot of fun.

My daughter is going into Kindergarten and she loved working in this book. She saw her brother doing his school work, and she always wanted to do some of her own. This book really gave her a great jump start and really set her up for success this year.

Loves to do the educational puzzles and similarity and opposites and the coloring puzzles. Some of it requires guidance from parents, but a kid can learn to do many of these on their own.

good for education!
