Aging, The Individual, And Society

Synopsis

No field of study more completely integrates the mature person over the life course than does gerontology. Understanding senior citizens—who represent a continually growing population—is becoming increasingly important. *AGING, THE INDIVIDUAL, AND SOCIETY* introduces readers to gerontology in a compassionate way that helps them understand older people and know how to work with them. The book balances academic research and practical discussions, integrating social and cultural perspectives with the story of the individual aging process. Activities and enhance reader's understanding and skills by providing many opportunities for experiential learning.

Customer Reviews

Susan Hillier is a former Coordinator of the Gerontology program at Sonoma State University. She holds a Ph.D in human development from the University of California, Davis.

The topic is interesting, and some of the information provided was interesting, but the textbook overall is very boring. It's a tedious read and much of the information seems common sense.

This book was needed for my university class and did a great job of getting a good product to study off for exams and quizzes.

Book smelled like weed but otherwise the book quality was like new

Good information although it needs to present more from the perspective of other cultures other than North American culture.

Very informative. learning a lot about the society views the elderly.

A great read and useful guide for us old folks.

Great

Arrived in great condition
