Customer Reviews

A very basic biology book aimed at the high school level or perhaps Junior high. Subjects are lightly discussed but there are hundreds of photos, diagrams and charts that illustrate the text very well. All the basic concepts and varieties of life are well treated, if somewhat briefly. This is a good beginners book for the biological world of life on earth.

We home school and we used this book for 10 grade high school science. Not being strong in science myself it covered in great detail what I myself didn't know. Good quality and detailed. There is a web sight and code you can enter after each chapter for a on line test. IT then scores it for you. You have the ability to retake the tests as many times as needed.

Not only is the book great but there is a website that has quizzes for each section that we use as assignments for homeschooling.

Excellent text for novice students. I tutor science and love this to help students confused by other texts. The end of chapter reviews and questions are great. I have many students complement this book for clarity on topics. A must for any high school to intro college bio student!

Book was fine. Shipping was good. Did not like profanity written in the book.

Great book and service! But wrong edition for us when in need to replace a high school library book. Returning it was painless, thanks for understanding and refunding.

do not uy it will not work on the computer. We tried everything without success/

Very happy would by from this seller again
