4 Star Review! This is a must-have reference for any childcare or school setting. The third edition of this excellent guide for childcare and school personnel on managing infectious diseases provides new information on when children may return to the classroom, as well as updated infection control practices and several new forms/resources. This book provides an overview of how infection is spread, infection control measures, daily health checks, and signs and symptoms. The guide is easy to understand, and written in language appropriate for personnel from a variety of settings. The guide was developed for childcare and school personnel. Health professionals, such as pediatricians and nurses (school nurses, nurse consultants), may find it useful in communicating

with education professionals in these settings. The quick reference sheets are a wonderful resource for explaining the common childhood infectious diseases. They are easy to read and provide clear, factual information for childcare and school personnel. While the skin rash pictures may be a bit overwhelming for non-health personnel, they highlight what may be seen in children in these conditions. Controlling the spread of infectious diseases and when to allow the child to return to school are essential information for school personnel. This guide provides excellent resources in the form of sample letters and forms. Finally, it provides helpful information such as recommendations for cleaning, selecting an appropriate cleaner, and food service cleaning. The book also may be helpful as these facilities develop policies and procedures to reduce infectious diseases. Doody's Review

Susan S. Aronson, MD, FAAP, works at the Pennsylvania Chapter of the American Academy of Pediatrics as a pediatric advisor for the Early Childhood Education Linkage System's "Healthy Child Care Pennsylvania. In 2011, she retired from her appointment as clinical professor of pediatrics at the University of Pennsylvania, The Children's Hospital of Philadelphia. A nationally recognized expert on health and safety issues in early education and child care settings, Dr Aronson is an ex officio member of the Executive Committee of the American Academy of Pediatrics Council on Early Childhood. She is the author/editor of *Healthy Young Children*, 5th Edition (2012). She is known to many educators from 2 decades of reading her column ("Ask Dr. Sue Your Health and Safety Questions") in *www.ChildCareExchange.com* Exchange magazine.

Great reference book for school nurses and Pediatrician offices. Very concise and quick to use as a reference. Love it.

The most informative book for childcares, school, and parents! Our "go to" book!

This book was invaluable! It provided everything I needed to know about recognizing and managing various illnesses that we see in preschools.

Good resource for work.

As a director of a child care center, this has been an invaluable resource. The detailed list of exclusion criteria helps ensure consistency and having the quick reference sheets on each

symptom/illness gives us an additional resource for not only our staff but for our parents as well.

Kindle version is incomplete and a waste of the money. They did forward to Tech team who knows how long it will take to be fixed.

Excellent resource for school nurses! Highly recommend.

Excellent resource. I'm a family physician, and the pages in this book make great handouts for parents to take to daycare or school when their child is ill regarding return to school.
