Solar, Wind And Land: Conflicts In Renewable Energy Development

Synopsis

The global demand for clean, renewable energy has rapidly expanded in recent years and will likely continue to escalate in the decades to come. Wind and solar energy systems often require large quantities of land and airspace, so their growing presence is generating a diverse array of new and challenging land use conflicts. Wind turbines can create noise, disrupt views or radar systems, and threaten bird populations. Solar energy projects can cause glare effects, impact pristine wilderness areas, and deplete water resources. Developers must successfully navigate through these and myriad other land use conflicts to complete any renewable energy project. Policymakers are increasingly confronted with disputes over these issues and are searching for rules to effectively govern them. Tailoring innovative policies to address the unique conflicts that arise in the context of renewable energy development is crucial to ensuring that the law facilitates rather than impedes the continued growth of this important industry. This book describes and analyses the property and land use policy questions that most commonly arise in renewable energy development. Although it focuses primarily on issues that have arisen within the United States, the book's discussions of international policy differences and critiques of existing approaches make it a valuable resource for anyone exploring these issues in a professional setting anywhere in the world.

Book Information

Paperback: 256 pages

Publisher: Routledge; 1 edition (October 24, 2014)

Language: English

ISBN-10: 0415520479

ISBN-13: 978-0415520478

Product Dimensions: 6.1 x 0.6 x 9.2 inches

Shipping Weight: 14.1 ounces (View shipping rates and policies)

Customer Reviews

"Rule (law, Arizona State Univ.) presents a diversity of relevant issues, the legal aspects of which he examines with a focus on the US. The chapters on wind energy development discuss relationships

with neighboring land owners, wind rights, and issues relating to wildlife. Summing Up:
Recommended. Graduate students, researchers/faculty, and professionals/practitioners." â €
CHOICE, R. J. Barthelmie, Cornell University

Troy A. Rule is Associate Professor of Law at Arizona State Universityâ €™s Sandra Day
Oâ €™Connor College of Law, USA. Prior to entering law teaching, he was an attorney at K&L Gates
LLP in Seattle, Washington, USA, where his practice focused primarily on commercial real estate
transactions and wind energy development.
