Writing A Proposal For Your Dissertation: Guidelines And Examples

Synopsis

This user-friendly guide helps students get started on--and complete--a successful doctoral dissertation proposal by accessibly explaining the process and breaking it down into manageable steps. Steven R. Terrell demonstrates how to write each chapter of the proposal, including the problem statement, purpose statement, and research questions and hypotheses; literature review; and detailed plan for data collection and analysis. Of special utility, end-of-chapter exercises serve as building blocks for developing a full draft of an original proposal. Numerous case study examples are drawn from across the social, behavioral, and health science disciplines. Appendices present an exemplary proposal written three ways to encompass quantitative, qualitative, and mixed-methods designs. User-Friendly Features *'"Let's Start Writing" exercises leading up to a complete proposal draft. *'"Do You Understand?" checklists of key terms plus an end-of-book glossary. *End-of-chapter quizzes with answers. *Case study examples from education, psychology, health sciences, business, and information systems. *Sample proposal with three variants of the methods chapter: quantitative, qualitative, and mixed methods.

Customer Reviews

"This book tackles one of the most daunting tasks that doctoral students face. By breaking down the proposal writing process in a manageable and thorough way, the book educates the student from beginning to end. It is a 'must read' for doctoral students--I would use it in all classes about the dissertation process and assign it to all doctoral students as soon as they start their

program! It also will be valuable for general research methods classes at the graduate level and any classes leading up to the doctoral dissertation requirement. Students will benefit from the concrete examples that bring the process to life."--Jacqueline V. Lerner, PhD, Program in Applied Developmental Psychology, Boston College "My eyes were starting to glass over late one night as I was trying to complete the required reading for a class--until I started reading this book. The straightforward writing style and examples were a breath of fresh air. Heck, I even chuckled out loud a few times. In sum, I went from 'My goodness, what have I gotten myself in for,' to 'Thank goodness, I can actually relate to this stuff!'"--Peter Wiernicki, first-year doctoral student in Educational Leadership, Johnson & Wales University, Providence, Rhode Island "Many students flounder in the process of writing a dissertation proposal. Terrell's book treats in depth what other works on writing a dissertation dispatch in a few paragraphs. He recognizes not only the importance but also the complexity of writing the problem statement and other elements of the proposal, and provides students with expert guidance in how to capture precisely a study's importance within a defined scope. Terrell's insights are wise and on target; students will find them to be of great value."--Steven D. Zink, PhD, Vice Chancellor, Nevada System of Higher Education "This book demystifies the entire dissertation proposal process, and is particularly helpful in the area of considering and refining a research problem. A major strength is the way Terrell clarifies the process by analyzing numerous topics in terms of their problem statement, purpose statement, and research question."--Frederick J. Brigham, PhD, Special Education Program, George Mason University "A valuable resource for my introductory research methods course. This text strikes the perfect balance between substance and practicality. It serves as an excellent supplement to the other required methods texts, and I intend to include it on the textbook list for all my future research courses."--Felice D. Billups, EdD, Professor, Educational Leadership Doctoral Program, Johnson & Wales University, Providence, Rhode Island "The style is accessible and conversational; perfect for apprehensive doctoral students who need a broad overview of the proposal process. I like the way the purpose statement is broken down into variables, participants, and location; this will be helpful to students."--Susan Troncoso Skidmore, PhD, Department of Educational Leadership, Sam Houston State University "Informative and easy to read. Terrell offers a succinct introduction to all the parts of a typical doctoral proposal--introduction, background literature review, and methods--and presents a range of examples for quantitative, qualitative, and mixed-methods approaches. The book provides a very useful perspective on different methodological approaches and how they fit into the doctoral proposal."--Paul Vincent, PhD, Department of Physics, Astronomy, and Geosciences, Valdosta

State University

Steven R. Terrell, PhD, is Professor in the College of Engineering and Computing at Nova Southeastern University, where he teaches quantitative and qualitative research methodology and statistics. He is active in the American Counseling Association, the American Psychological Association, and the American Educational Research Association, where he chaired the Online Teaching and Learning Special Interest Group. Dr. Terrell serves on the editorial boards of several national and international journals and is the author of *Statistics Translated: A Step-by-Step Guide to Analyzing and Interpreting Data*, as well as more than 120 journal articles, book chapters, conference papers, and presentations.

Full disclosure: Dr. Terrell was my best professor at Nova Southeastern where I earned my Ed.S. He is not only amazing at explaining the use of statistics (his other book), he is the only professor that ever explained the dissertation process to me in a way that made sense. If you are writing a dissertation, this is the book you need.

This book met more than my expectations! Dr. Terrell is great at breaking things into a simplified method. I knew this book would be great because his book "Statistics Translated" is in my collection of doctoral resources. All doctoral students need to purchase this book!

I used this book in a dissertation proposal seminar this summer and it worked really well to give my doctoral students an overview for writing their dissertation proposals.

This is super helpful. It outlines the requirements of dissertation proposals in a clear, easy to read manner.

Informative, easy to read, and exemplars. Well worth the cost.

What an awesome book! This book was a big help when it came to writing my master's proposal.

Great book , straight forward with no fluffing

very good text for beginners who aspire to write a good dissertation, down to earth explanations

nothing could be more basic than this. I am using it to review my dissertation to know where I have gone erroneously wrong?
