Science Test Practice, Grade 7 (Spectrum)

Synopsis

Spectrum Science Test Practice provides the most comprehensive strategies for effective science test preparation! Each book features engaging and comprehensive science content including physical science, earth and space science, and life science. The lessons, perfect for students in grade 7, are presented through a variety of formats and each book includes suggestions for parents and teachers, as well as answer keys, a posttest, and a standards chart. --Today, more than ever, students need to be equipped with the essential skills they need for school achievement and for success on proficiency tests. The Spectrum series has been designed to prepare students with these skills and to enhance student achievement. Developed by experts in the field of education, each title in the Spectrum workbook series offers grade-appropriate instruction and reinforcement in an effective sequence for learning success. Perfect for use at home or in school, and a favorite of parents, homeschoolers, and teachers worldwide, Spectrum is the learning partner students need for complete achievement.

Grade Level: 7 and up

Customer Reviews

We bought this because my daughter's science teacher did not teach much of anything last year. The content is good, and it is more like a common core type of questions. Answers to these open

questions are not always good so parents or tutor has to be able to compensate.

I am using this book for Georgia CRCT review for a ESOL seventh grader who makes high grades. Standardized tests are a problem for ESOL students because of the timed element and the inability to ask for explanations on English phrasing. I bought Science, Grade 7 (Spectrum Science) in conjunction with this book.

This is a great and powerful tool that can and will help your child to understand and operate on an above average level. Well worth the money.

Good preparation for SAT testing.

Good

Spectrum Books were recommended by my child's teacher. Now I can understand why. We home school and these books are great. They self teach and are easy to understand. They are economically priced which is rare in educational books. I find that every Spectrum Book on every subject is equally as great. Not only are they valuable to home schooled kids like mine, they also are great to tutor kids in traditional schools who may need a little help. I will never hesitate to buy any book under the Spectrum name brand. They are tops. However it's my nature to be picky, so here it goes, the only thing I recommend is removing the answers from the back of the book. All the pages have been conveniently perforated. Because if you have a child like mine, he'll discover this before you do and whiz through his assignments without getting any question wrong. I'll be buying these books for years to come. I love them and it will be hard to find anything better.

We are a homeschooling family and I simply don't know how we could do it without Spectrum! These books are wonderful not only as teaching books but testing books. They don't just test the children but they test me, their teacher, to make sure that I'm keeping up with their grade level, falling behind it, or the children need more of a challenge. I simply can't do without them and the children love doing the assignments and quizzes (depending on the type of book you're purchasing) in them so that's always a bonus for me! Also, there's no way a consumer can beat their prices! Let's face it, educational books are expensive but with Spectrum I'm paying fair prices and getting great teaching materials. It's a win-win across the board!

this book covers science for the grade level that is not found in most other books, a must have well worth the money
