"Keepers of the Earth, is a sensitive and well thought-out guide for helping children love and care for the Earth. I heartily recommend it as a resource for parents and teachers." —Joseph Cornell, author of *Sharing Nature with Children* and *Listening to Nature*"Keepers of the Earth is a fascinating way to learn about our environment. The combination of Native American stories and related activities will spark children's imaginations and help them explore their environment." —Augusto Medina, Ph.D., education specialist, World Wildlife Fund"This wonderful balance of scientific and indigenous people's outlooks empowers children to touch the continuum of nature pulsating within and around them. The reconnection makes possible their creation of vital new stories to cope with today's misguided beliefs about the natural world." —Dr. Michael J. Cohen, director, National Audubon Society Expedition Institute; author, *How Nature Works: regenerating Kinship with Planet Earth*"By combining the Native American flair for storytelling with modern western understandings of science and education, Caduto and Bruchac acquaint youngsters with the natural world and our relationships with it. our youth to a sustainable future. School, club and camp youth leaders will find this book a treasure." â "Charles E. Actually, these canned questions do not fit this book as it has stories but also activities for children that are fabulous. I bought three and gave them to friends who have children..... this is a great book to teach about honoring Nature. There are also updates in publishing for this book.... however, this is the one I am convinced would draw families together if they did them together.

This collection of short works surrounding all things in nature is amazing. I love just being able to pick it up and instantly find something to soothe my soul. Should be in everyone's library. Inspiring, moving, thoughtful works. Love it.

This is an 'oldy but goody' for a teacher/parent collection where the stories are spellbinding for the imagination, and the follow up activities bring us nearer to nature and understanding the great gifts that we have been bestowed to us by our mother earth.

Best Native Story book ever. Love it, has lesson plans and conversation topics this book is an amazing gift to a family for bed time.
