Aced is the kind of book I needed. Interviews and the interviewing process can be painful, especially for an introvert. It is hard to put yourself out there with the potential for rejection. Gerald Ratigan shares his experiences and missteps, along with ways to improve and why you will stand out to the interviewer. He offers insightful advice from interviewing potential candidates, along with his experience of being interviewed. The level of detail included in the book, made me think of some new ideas to implement. The nine success tips were helpful, and the two closing questions will definitely be utilized. The chapter on technology and the shift to online interviews was timely and had some great tips. This is an important book for anyone job hunting, as well as, anyone looking to move up the ranks within their current job.

You're prepared and rehearsed for the BIG interview for your dream job. You're nervous, but you think you aced it. Then you wait, and wait...and wait some more. And eventually hear that they hired someone else. But WHY? I've been through this painful process, as you probably have too (as has just about everyone who strives for bigger and better) and, frankly, it cuts you deep. Worst of all is you just know you could have won that opportunity...if only. Here is wise and perceptive job-hunting warrior and self-confessed hire-er, striver and job-hopper to explain exactly what to do and what NOT to do to ACE the interview and win the job you really want. My only regret that this book comes towards the end point of my career - it would have made a huge difference earlier on. But for anyone just graduating, career-changing, moving on, moving up, downsized, discouraged, wanting more and knowing they deserve it, this is the basic how-to manual to getting there. Highly recommended for anyone in the job market who needs the tools to ace the interview and win the job of their dreams. This should be on the must-read list of anyone just graduating or trying to navigate a tough job market and needing the wise counsel of someone who's been there, navigated that, and come out a winner.

ACED is for you if you are looking for a better position or if you are unemployed and want to get

hired quickly. It's much more than just a book on interviewing. It contains an easy-to-follow, step-by-step blueprint for landing your dream job, as well as a resources section with a link to free bonuses. If you want a better job, get this book, read it, and implement the advice. You'll be glad you did. Want to help your present or future company increase sales and profits and be a star? ACED is very helpful for any job seeker. Whether you are looking for an entry job or a high level executive position, this book has the guidance you need. ACED covered everything from the basics to advanced interviewing skills and how to handle those tricky behavioral questions. I found the information to be extremely practical for everyday use in addition to interviewing. I'm glad I have learned how to leverage technology to set myself apart of other job applicants. Next time I prepare for an interview I will definitely use your advanced interview questions and answers. And, this weekend I'm going to be working on my negotiating skills. Next opportunity I have with the boss, I'll be asking for a raise.

ACED helps its readers gain superior interview skills to gain unfair advantages in order to land dream jobs! Seemingly, a tall order but its author, Gerald Ratigan, pulls off this tall order. His book is set out clearly and reads well. It goes through various strategies for landing your dream job. There are moments in the book where Gerald Ratigan asks his reader, after that dream job, to stop reading and go to various websites to sign on. (Here, I'm thinking of his emphasis on LinkedIn.) He is a teacher and a good one at that. He asks his reader to look at his profile to see how a profile is done! He is ready to answer any questions. He also asks his students to list various important issues in their lives. For example, organisations that may be a good fit to join or groups of interest. He articulates why. It is to build up a profile, to meet people, to increase contacts and to connect. His advice is concrete and logical. He asks his student-readers to follow him by providing them with good examples that act in a similar way to excellent role-models. He articulates clearly the incredible revolution, and therein problematics, of the internet where candidates can get lost in websites, rather like spider-webs spun by the net, and where because of a clearly defined global market, potential job-seekers must pit their skills against thousands of other excellent students. However, Ratigan is not just a skilled interpreter of the internet, a guy with lots of relevant experience, and someone willing to share. He can also cross-reference effectively so he is able to use writers like C. S. Lewis to advantage. "Hardships often prepare ordinary people for an extraordinary destiny." I would query

Lewis's use of "an extraordinary destiny" (surely "extraordinary destinies" would be more correct) but the thought is far-ranging and even takes in that ever present dirge that some drag up and out repetitively about suffering and why???!! Well, Lewis seems to say hardships (sufferings) help! "God", who did such a bad job, according to some, is really doing not so badly! But I stray and start to ride one of my very own hobbyhorses! Please read this book which has lots of answers to difficult questions. It is thoughtful, helpful, and well written.
