Angela Banner first wrote Ant and Bee as a way to teach her son how to read. The first book in the series was published in 1950. Since then, Angela has written 22 Ant and Bee books.Â

My 4 year old has such a fun time reading together with this book. The words used and stories told are fun, interesting and just a little naughty to be more fun for a 4 year old.

So glad they finally reprinted these!

I grew up with Ant and Bee and was surprized that they were no longer in print. marketplace fortunately was the place to find them, and fter some time, I now have all 13 for my daughter who loves books. The prices are often ridiculous, but if you keep a look out can get them for around \$30-still alot for a small book, but I had sentimental reasons for wanting my children to read these

delightful treasures. Each book has a theme, and most planned around the alphabet. Ant and Bee are 2 friends who travel around the world and have adventures together. Through these your child can learn about colours, time, days of the week, being sick, travelling around the world and starting school. My daughter loves hers and I still do too. Later she will be able to help read along as different words written in red are repeated throughout the book and intended help new readers.

my children loved ant and bee and now their children do as well

Wonderful book! My students love this series and it's great that they are back in print!!
