Create Three Dimensional Jewelry: Combine Stitching, Embellishing, Layering, And Riveting

Synopsis

Inspired by the craftsmanship and attention to detail of early costume jewelry, Heather DeSimone demonstrates how to create fun, one-of-a-kind pieces by teaching techniques for layering readily available components in *Create Three Dimensional Jewelry*. Jewelry makers will learn how to layer premade components, make beaded clusters, create beaded loops, weave seed beads, embellish filigree components, rivet stamped metal pieces, and more as they create 21 unique projects. Most importantly, mastering this three-dimensional approach to building jewelry teaches designers to think about using their materials in a new way.

Customer Reviews

Heather DeSimone is an owner of The BeadinTM Path, a bead shop specializing in vintage and Lucite jewelry in Freeport, ME where she also resides.

I have a number of jewelry making books and although this is a very good book and his informative information, I own others that I consider better. I re-purpose vintage and antique jewelry, buttons, findings etc. into new jewelry pieces and wanted some new ideas. There were some great

ideas and step by step instructions. I would recommend this book to people newer to jewelry design.

I am always looking for a new take on jewelry design, and this book gave me many new ideas and directions to follow. It's practical, with good clear photos, and very inspirational.

Great book! Inspiration galore! Recommend for anyone who loves the art of making Jewelry!
Thanks Heather DeSimone! Great, great book!

Very good book, learned a lot of new techniques and got some great ideas. Was glad to find this book is available.

I didn't find anything new as far as instructions and the designs were nice but not to my liking. I returned the book for this reason. It just wasn't my thing. I would suggest reviewing the book for the designs it may be because these design may be just your thing and a great book for you.

"21 creative, colorful, and stylish jewelry projects." "Combine stitching, embellishing, layering and riveting." "I love step-by-step photos. I've never been one to read instructions. The step-by-step photos in this book seem very clear and of good quality. Techniques include: layering, riveting, embellishing, stamping metal, bead stitching, knotting and wire wrapping loops. Heather DeSimone has a very unique and admirable sense of style. I appreciated her artist disclaimer about not being overly meticulous. This is something that I can relate to. I also enjoyed learning more about how she got involved in vintage plastics. She has some amazing beads! If you want a book that will encourage you to try many different techniques to make your own unique jewelry, I think that you will thoroughly enjoy this book. You can simply recreate the projects in the book or take them in a new direction using beads from your own bead stash. Many of the techniques are universal for modern day jewelry design.

If you love Miriam Haskell jewelry and want to create your own in that style, then Heather DeSimone's book, *Create Three Dimensional Jewelry*, would be a great resource. She breaks down the mystique behind this eclectic style into easy to understand instructions. I would have liked to see a resource(s) for purchasing some of the unique components in the book.

This is a great book for people who love vintage costume jewelry. It's full of creative ways to use

vintage and vintage inspired beads. It's a must have book
